ENGINEERED FOR FILTERED FRESH DRINKING WATER

EWI[®] Gold Series G5[™] system uses the most advanced water treatment technologies available today. The G5[™] incorporates Reverse Osmosis technologies which are recognized as one of the best available technologies for producing the very best quality drinking water.

It's also the same method used by many bottled water companies to make safe and great tasting water. No other home water treatment system can offer you as much protection and reliability. EWI[®] G5[™] system uses a 150 LPD membrane which is powerful, fast and has excellent efficiency rating.
